

At the moment, the links shown to each page in this diagram are:

Home page: connects to all pages

About Us page: connects to history page and home page only.

History page: connects to About Us, Menu, and home page only.

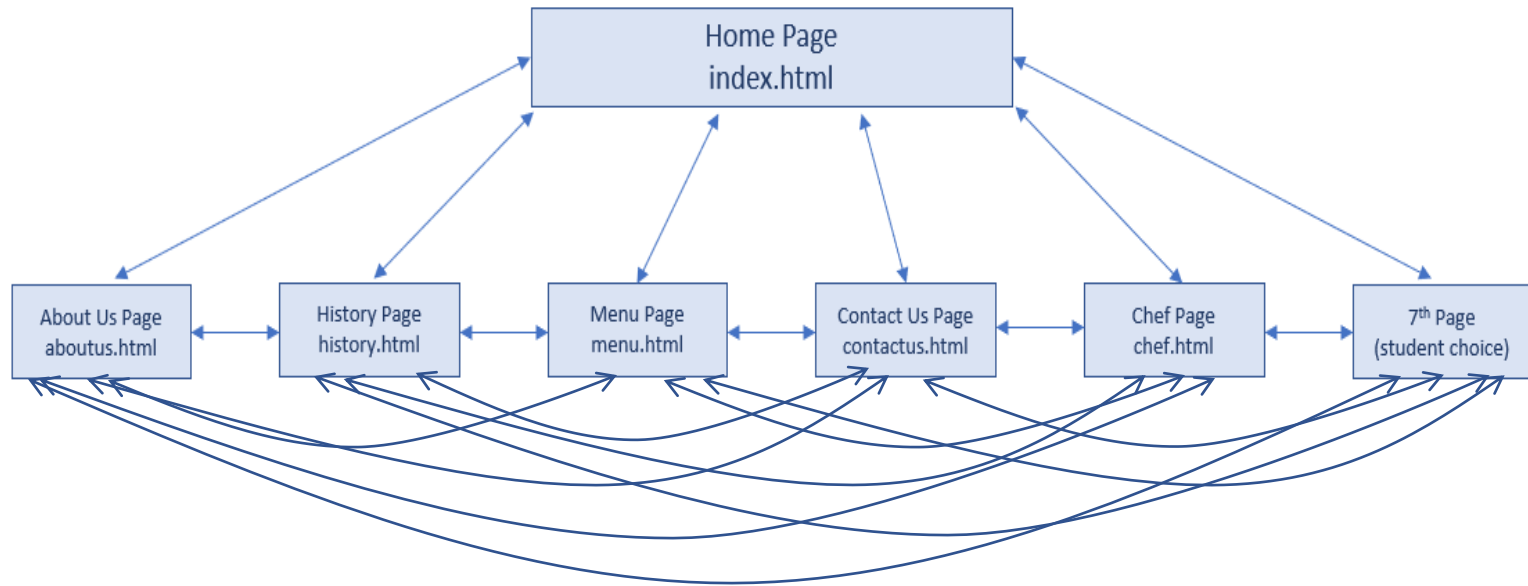

Menu page: connects to History page, Contact Us page and home page only.

Contact Us page: connects to Menu page, Chef page and home page only.

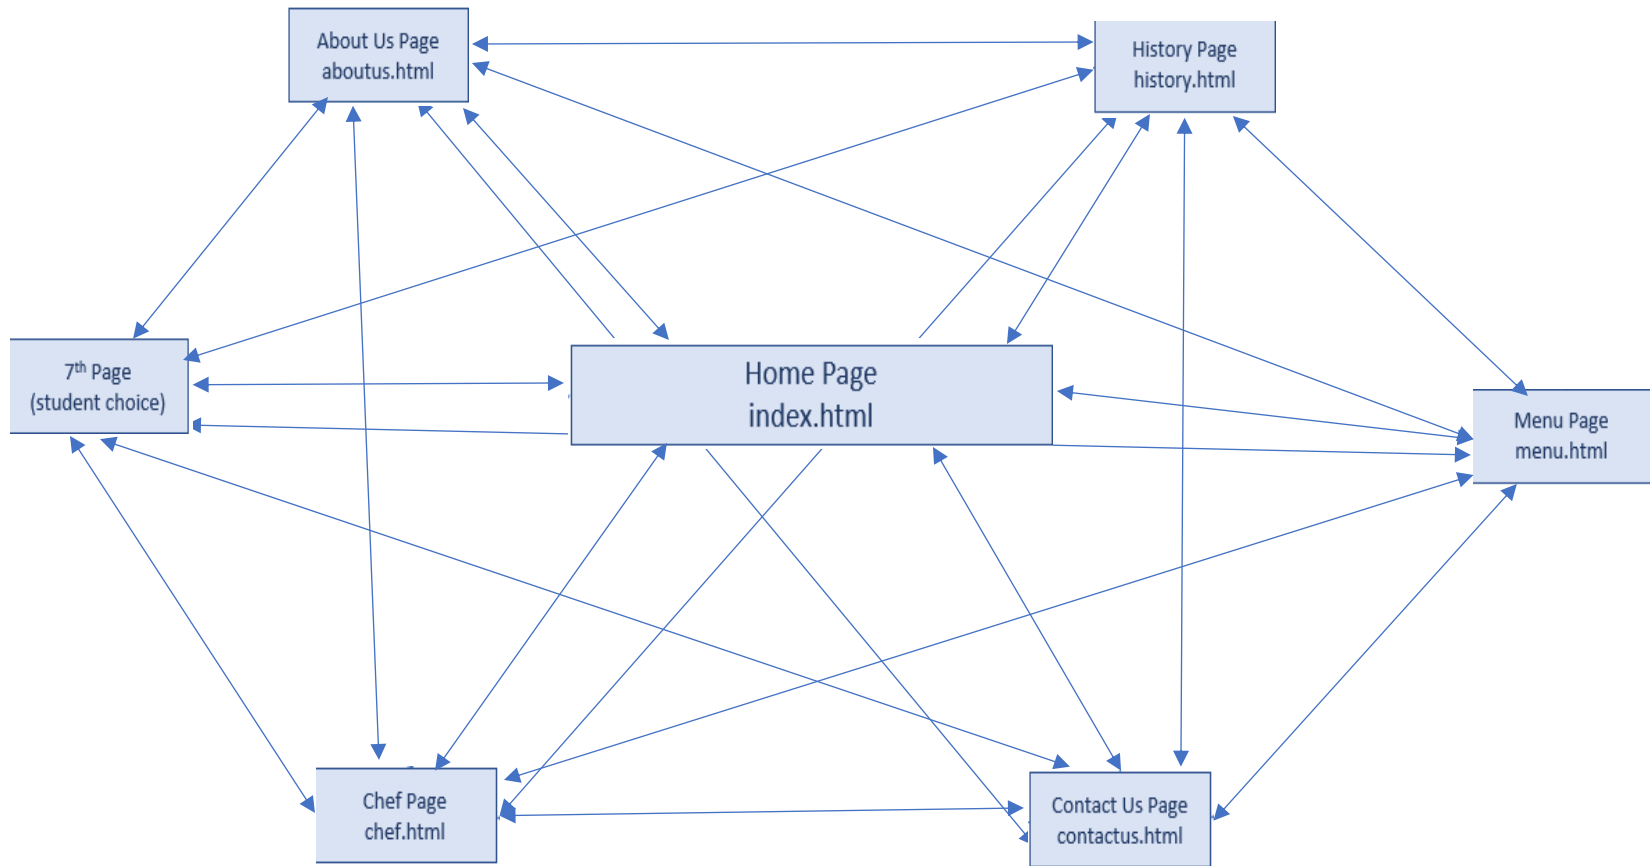

Chef page: connects to Contact Us page, 7<sup>th</sup> page and home page only.

7<sup>th</sup> page: connects to Chef page and home page only.

This is not a representation of global navigation.

Now, every page connects to every other page. This is global navigation.

This is another way to represent global links.
