MTH 459, Quarto Tutorial #5, Spring 2025

Some aspects of these Quarto Tutorials will be review, but it will be good to have some clear and specific examples/templates for you to work with going forward and for presenting the results of your capstone project. Each of these Quarto tutorials will render a different type of document: HTML, Word, PowerPoint, and LaTeX/pdf.

Create one professional document in Quarto for your capstone. You can choose from:

1. Your annotated bibliography
2. Your research proposal
3. The presentation for your research proposal
4. The research paper
5. A short presentation on your final research results

Your documents (bibliography, proposal, paper) can be rendered in either HTML, Word or LaTeX, or PowerPoint for the presentations. If you choose HTML, remember to print it to pdf for submission. You can recreate a document you've already submitted, or choose to submit a new one.

You should try to make your documents as professional as possible.
